Your Agency's Data Won't Get Hit?

Only 35% of companies invest in cyber-liability insurance, even though studies show that more than 72% of data breaches occur in small-to-medium-sized businesses.

Failure to notify the affected individuals “without unreasonable delay” could cost your agency up to \$1.5 million in fines from the federal government. Add this to the \$200,000 average cost to comply with notification laws, the legal liability, and the reputational harm caused by the breach, and you can quickly see how this exposure could devastate your agency.

We have partnered with Arlington/Roe to offer members an exclusive program to help protect their agencies from information security breaches. The holistic risk management program helps train staff on privacy compliance in addition to handling data breach notification and third party results.

A data breach program you can gamble on
